Career Objective

Motivated and detail-oriented Software & App Developer with hands-on experience in Android (Kotlin, Java) and Python GUI (Tkinter, Kivy) development. Previously trained as an IT Support Engineer at Pearl Continental Hotel Rawalpindi, with strong skills in troubleshooting, server monitoring, and IT operations. Passionate about creating modern, user-friendly mobile and desktop level applications while continuously improving technical expertise in full-stack software development.

Professional Experience

IT Support Trainee – Pearl Continental Hotel, Rawalpindi (Apr 2025 – Jul 2025)

• Provided technical support for hotel systems, network troubleshooting, and user assistance.
• Managed server backups, printer configuration, and system maintenance.
• Handled IT setups for business meetings, guest events, and kitchen training sessions.
• Ensured stable connectivity and projector configurations for presentations.
• Conducted regular inspections of server and exchange rooms to maintain uptime.

Video Editor & Content Researcher – Hashtag Media, Gullberg Islamabad (Dec 2021 – Jan 2025)

• Edited and enhanced media content using Adobe Premiere Pro and After Effects.
• Researched trending topics and contributed to creative content strategy.
• Collaborated with multidisciplinary teams to deliver quality media within deadlines.

Software & App Development Projects

SweetCare App (Android Studio)

Health management app for tracking daily sugar levels, reminders, and automated PDF report exports.
Technologies: Kotlin, Jetpack Compose, Firebase, Android Studio

Al-Muqeet Milk (Desktop App)

Full-featured business management application for milk sales, billing, and customer management. Includes login system, reports, and rate management features.
Technologies: Python (Tkinter), SQLite

Python Kivy Applications

Developed lightweight Android apps using Python Kivy framework, focusing on responsive design and efficient UI performance.

Al-Muqeet Milk (Android App)

- Android Development (Kotlin/Java): Engineered a native Android application using Kotlin and Java within Android Studio, focusing on a responsive UI for on-the-go delivery tracking.
- Modern Tooling**:** Leveraged the K2 compiler mode and Material Design principles to ensure high performance and a modern user experience.
- Core Features**:** Implemented secure user authentication, real-time rate management, and automated PDF report generation for daily sales.
- Database Integratio**n:** Utilized SQLite for local data persistence and Firebase for cloud synchronization and real-time updates.
- Technologies**:** Kotlin, Java, Android Studio (Narwhal).

Technical Skills

App & Software Development: Kotlin, Java, Python, Android Studio, Kivy, Tkinter
Databases: Firebase, SQLite
UI/UX & Tools: Jetpack Compose, XML Layouts, Material Design, Figma
Networking & Systems: Windows/Linux administration, Server Backup, Troubleshooting
Version Control: Git & GitHub
Media Tools: Adobe Premiere Pro, After Effects
